2. Water Quality - Potential Points (23.5 % of Total) - 40

A. Surface Water Pollutants - (20) Points Maximum			
There is a probability that runoff water from irrigated fields contains sediment, salt, pesticides, and/or nutrients (or other associated chemicals). Treatment is needed to prevent these pollutants from entering live waters, or re-entering a shared irrigation system. Points will be awarded based on distance from the end of field to the nearest live waters or re-entry point into a shared irrigation system. If there is no run-off, after points will be 0.

1,320 - 2,640 Ft.	10	0	
>2,640 Ft.	5	0	
A. Surface Water	Total	0	

B. Ground Water Pollutants - (20) Points Maximum			
There is a probability that irrigation water containing salt, pesticides, and/or nutrients (or other associated chemicals) is leaching into the ground water. Treatment is needed to prevent these pollutants from contaminating ground water, through leaching and direct return flow into wells. Points to be awarded based on depth to the water table, or

3. Selected Conservation Practice(s) - Potential Points (41% of Total) - 70

Any practice used in the ranking criteria and intended to be included in the conservation plan of operations must be cost-shared or have an incentive payment. Higher priority (value) should be given to those practices which address multiple resource concerns, are cost effective, and have longer life spans. Use the Quality Criteria in the FOTG to establish the practices that have an impact on the identified resource concern.		Potential Points	Percent of need to be installed.	Points

4. Other Considerations - Potential Points (12% of Total) - 20

Below are some suggested, not required, criteria. If there are other criteria the D.C. wants to recommend based on LWG advice, please include them here.		Potential Points		After Points
A. At risk species are in the area and the contract will enhance habitat for the species.		5		
B. Treatment of this land could have a beneficial impact on a 303d listed stream segment.		5		
C. Treatment of this land could enhance the benefits of an active sec. 319 project.		5		
D. This land is within a proposed sec. 319 project.		5
